Project Management Professional (PMP)®
Examination Report

Candidate: Yixing Xu

Examination Result: FAIL

Domain	Your Results
Initiating the Project	Below Proficient
Planning the Project	Below Proficient
Executing the Project	Below Proficient
Monitoring and Controlling the Project	Below Proficient
Closing the Project	Below Proficient

An overall result of "Fail" indicates that you have not achieved the required proficiency on the PMP examination to obtain the credential.

A diagnostic representation of your proficiency level per domain has been provided above.

Understanding Your Exam Results
Your exam results are reported in two ways:
1. An overall pass/fail result score is generated based on the number of questions you answered correctly.

2. The second level of results is the assignment of one of three proficiency levels to each domain.
   - Each domain is assigned one of three levels of proficiency - Proficient, Moderately Proficient and Below Proficient - based on the number of questions answered correctly within the domain.
   - This provides direction about where your strengths and weaknesses fall.

PMI defines the levels of "proficiency" as follows:

Proficient - indicates performance is above the average level of knowledge in this domain.
Moderately Proficient - indicates performance that is at the average level of knowledge in this domain.
Below Proficient - indicates performance is below the average level of knowledge in this domain.

For more information regarding the exam domains, please refer to the *PMP Examination Content Outline* under Certification on PMI.org.
